Notes to Reader

This is censored material. Collecting it was VERY hard. The system distorts these facts in so many ways brevity prevents me mentioning them here. I did my best to find the truth, and I hope it brings you liberty and health. I partly made this resource as a tool to help you conduct your own research, especially section **11**: “Famous Medical Experts Speaking Out” and section **3**: “Useful Resources for Understanding the Covid Crisis”. I invite you to copy this reference list and use it as a template to add to as this story unfolds. Richard.

-<https://www.dailymail.co.uk/news/article-9250131/Boris-Johnson-says-Britons-WONT-need-Covid-vaccine-passport-pub.html>
2. Despite this the day pubs, football stadiums, nightclubs etc opened he changed his stance against mandatory domestic vaccine passports to making full vaccination a condition of entry. The government has on several occasions voiced its opposition to Covid passports, with Vaccines Minister Nadhim Zahawi tweeting in January: “We have no plans to introduce vaccine passports... No one has been given or will be required to have a vaccine passport”.
- <https://twitter.com/nadhimzahawi/status/1349107577481809920?lang=en>
3. 28/09/21 - The British government has been accused of trying to bypass Parliament in an effort to implement vaccine passports via the backdoor, with the scheme under review AGAIN despite assurances it wasn't being considered:

 3. **Understanding the results:** The paper reported 104/827 spontaneous abortions in the first trimester, 12.5% is in line with normal rates. However, 700 of the women only had their injection after the first trimester. Therefore, only 104 of these 827 women were injected whilst pregnant in the first trimester. The investigative journalist went on to conclude that 827 – 700 with the later injection = 127 women with the injection in the first trimester, which leads to $104/127 = 81.8\%$. However, the other 700 women would be bringing with them standard background first trimester abortions of something like >10%, which makes the results inconclusive. This study needs to know how many of the 104 first trimester injected group had abortions, which it does not conclude. There is obfuscation from the part of the scientists here, and the journal was later amended. That said, this is not the 80% miscarriage smoking gun as originally suspected.
